

CALL FOR PAPERS
39th International Energy Workshop
Freiburg, Germany, 14-16 June, 2021

Deadline for abstracts submission: February 1, 2021

The 39th edition of the International Energy Workshop (IEW) will be hosted by **Fraunhofer ISE** in **Freiburg, Germany on 14-16 June, 2021**.

The IEW (www.internationalenergyworkshop.org) is a leading conference for the international energy modelling community. In a world of environmental and economic constraints, energy modelling is an increasingly important tool for addressing the complexity of energy planning and policy making. The IEW provides a venue for scholars and researchers to compare modelling tools, to discuss modelling advances for emerging energy sector issues, and to observe new trends in the global energy sector.

The Fraunhofer Institute for Solar Energy Systems ISE (www.ise.fraunhofer.de), with a staff of more than 1200, is the largest solar energy research institute in Europe. Fraunhofer ISE is committed to promoting sustainable, economic, safe and socially just energy supply systems based on renewable energy. Focusing on energy efficiency, energy conversion, energy distribution and energy storage, the Institute develops materials, components, systems and processes and provides system analysis for local, national and international energy systems. One particular feature of Fraunhofer ISE is its excellent technical infrastructure and its capability to provide comprehensive system analysis.

Call for Papers - The deadline for paper submission is February 1st, 2021

Researchers and practitioners from countries around the world are invited to submit original papers with new and innovative results on scientific, technical and practical experience on the economics of energy and climate systems. As is customary for the IEW, papers should be quantitative and rigorous.

A (non-exclusive) list of potential conference topics is:

- **Reaching net-zero emissions:** modelling the transition; sectoral modelling enhancements and linking *Nationally Determined Contributions* and *Sustainable Development Goals* with long-term decarbonisation strategies
- **Emerging markets and decarbonisation:** modelling future energy services, synthetic fuels and resources analysis for the energy sector in transition
- **Managing power system transitions:** addressing flexibility and system aspects for the integration of variable renewables; market design; integrated modelling looking at future energy systems and dealing with short-term issues
- **Technology insights:** role of technologies in the energy transitions (e.g. CCUS and negative emission technologies, hydrogen, energy efficiency in demand and supply)
- **Cities and digitalisation:** analysing the transition in cities and the impact of smart and digital technologies on the future energy system
- **Socioeconomic analysis of the energy transition:** employment, skills, health, investments, consumer bills, integrating behaviour in energy models

Selected papers will be presented and discussed in thematic sessions, circulated during the meeting, and also posted on the meeting website.

Submission of papers

Full papers or long abstracts (minimum 1000 words) in .pdf format should be **submitted online** no later than **February 1st, 2021**. **The submission online system will be soon available.**

Please note that paper selection has become increasingly competitive in recent years. Submissions that fully describe a complete analysis are generally more likely to be accepted than long abstracts. In particular, when submitting a long abstract, please ensure that the study and results are sufficiently described to allow comparison with full paper submissions. Each person can present only one selected paper, although multiple submissions and co-authorship are allowed. Please kindly complete one online form for each paper. Abstracts and presentations submitted by the authors will be available online after the event. Authors will have the option to opt out and choose not to publish the abstracts or presentations on the conference website.

Program Committee

The selection of submitted papers and long abstracts is directed and made by the IEW Program Committee, which includes, among others, the IEW co-directors and the 2020 local organisers:

- Geoffrey Blanford, Electric Power Research Institute (EPRI)
- Massimo Tavoni, RFF-CMCC European Institute on Economics and the Environment (EIEE)
- Bob van der Zwaan, TNO Energy Transition and University of Amsterdam (UvA)
- Hans-Martin Henning (Fraunhofer ISE)
- Thomas Schlegl (Fraunhofer ISE)
- Christoph Kost (Fraunhofer ISE)
- Christof Wittwer (Fraunhofer ISE)
- Gerhard Stry-Hipp (Fraunhofer ISE)
- Noha Saad Hussein (Fraunhofer ISE)
- Philip Sterchele (Fraunhofer ISE)
- Charlotte Senkpiel (Fraunhofer ISE)
- Christopher Hebling (Fraunhofer ISE)
